IN THE CLAIMS

Please amend the claims as follows:

1. (Original) A computerized gaming system, comprising:

a gaming module, comprising a processor and gaming code which is operable when executed on the processor to conduct a reel slot machine wagering game on which monetary value can be wagered; and

an audio module, the audio module operable to play an audio track during reel spins, the audio module further operable to maintain audio track rhythm over multiple reel spins.

- 2. (Original) The computerized gaming system of claim 1, wherein the audio module is operable to maintain audio track rhythm over multiple reel spins by playing a track continuously and by further fading in the track in conjunction with a spinning reel and by fading out the track in conjunction with a stopped reel.
- 3. (Original) The computerized gaming system of claim 2, wherein the audio module is further operable to loop play the continuous track such that rhythm of the track is maintained.
- 4. (Original) The computerized gaming system of claim 1, wherein the audio module is operable to maintain audio track rhythm over multiple reel spins by playing the track from a point calculated to maintain rhythm from a previous reel spin upon initiation of reel spin.
- 5. (Original) The computerized gaming system of claim 1, wherein the reels are video representations of reels on a video slot machine.
- 6. (Original) The computerized gaming system of claim 1, wherein the reels are mechanical reels under the control of the computerized gaming system.

AMENDMENT AND RESPONSE UNDER 37 CFR § 1.111

Serial Number: 10/764,740

Filing Date: January 26, 2004

Title: GAMING DEVICE HAVING CONTINUOUS RHYTHM REEL SOUND

7. (Original) The computerized gaming system of claim 1, wherein the audio module is operable to maintain audio track rhythm over multiple reel spins by playing a track continuously and by further fading in the track in conjunction with a spinning reel and by fading the track to a reduced volume in conjunction with a stopped reel.

- 8. (Original) The computerized gaming system of claim 1, wherein the audio module is further operable to play at least one additional audio track in rhythm with the audio track played during reel spin.
- 9. (Original) A method of operating a computerized gaming system, comprising:
 playing an audio track during reel spins of a reel slot machine game via an audio module,
 the audio module further operable to maintain audio track rhythm over multiple reel spins, and
 wherein the reel slot machine game comprises a game upon which monetary value can be
 wagered.
- 10. (Original) The method of claim 9, wherein the audio module is operable to maintain audio track rhythm over multiple reel spins by playing a track continuously and by further fading in the track in conjunction with a spinning reel and by fading out the track in conjunction with a stopped reel.
- 11. (Original) The method of claim 10, wherein the audio module is further operable to loop play the continuous track such that rhythm of the track is maintained.
- 12. (Original) The method of claim 9, wherein the audio module is operable to maintain audio track rhythm over multiple reel spins by playing the track from a point calculated to maintain rhythm from a previous reel spin upon initiation of reel spin.
- 13. (Original) The method of claim 9, wherein the reels are video representations of reels on a video slot machine.

Title: GAMING DEVICE HAVING CONTINUOUS RHYTHM REEL SOUND

Dkt: 1842.013US1

(Original) The method of claim 9, wherein the reels are mechanical reels under the 14. control of the computerized gaming system.

- (Original) The method of claim 9, wherein the audio module is operable to maintain 15. audio track rhythm over multiple reel spins by playing a track continuously and by further fading in the track in conjunction with a spinning reel and by fading the track to a reduced volume in conjunction with a stopped reel.
- (Original) The method of claim 9, wherein the audio module is further operable to play at 16. least one additional audio track in rhythm with the audio track played during reel spin.
- (Original) A computerized gaming system, comprising: 17.

a gaming module, comprising a processor and gaming code which is operable when executed on the processor to conduct a reel slot machine wagering game on which monetary value can be wagered; and

an audio module, the audio module operable to play an audio track during reel spins at a louder volume level and to play the audio track at a quieter or muted volume level when the reels are not spinning, the audio module further operable to maintain audio track rhythm over multiple reel spins.

- (Currently Amended) The computerized gaming system of claim [[12]] 17, wherein the 18. audio track comprises multiple audio element tracks, and wherein only select audio element tracks are played on each reel spin.
- (Original) The computerized gaming system of claim 18, wherein at least one of the 19. selected audio element tracks played on each reel spin is randomly selected for each reel spin.

Dkt: 1842.013US1

(Currently Amended) A machine-readable medium with instructions stored thereon, the 20. instructions when executed operable to cause a computerized gaming system to:

conduct a reel slot machine wagering game upon which monetary value can be wagered; and

play an audio track during reel spins at a louder volume level and to play the audio track at a quieter or a muted volume level when the reels are not spinning, the audio module instructions when executed further operable to maintain audio track rhythm over multiple reel spins.

(New) A computerized gaming system, comprising: 21.

a gaming module, comprising a processor and gaming code which is operable when executed on the processor to conduct a reel slot machine wagering game on which monetary value can be wagered; and

an audio module, the audio module operable to play an audio track during reel spins, the audio module further operable to stop presentation of the audio track between reel spins while maintaining audio track rhythm over multiple reel spins.

(New) A method of operating a computerized gaming system, comprising: 22.

playing an audio track during reel spins of a reel slot machine game via an audio module, the audio module further operable to stop presentation of the audio track between reel spins while maintain audio track rhythm over multiple reel spins, and wherein the reel slot machine game comprises a game upon which monetary value can be wagered.
